

# Tufin Orchestration Suite™

## SecureTrack

### Product Brief

## Firewall & Security Policy Management across Multi-Vendor Firewall Environments & Cloud Platforms

Enterprise IT has become complex and diverse – maintaining and managing these environments has become exponentially more challenging. Consequences of this complexity can range from a single application connectivity issue to large-scale cyber attacks damaging the core business. What's needed is a simplified, centralized view of security policies across multiple vendors/platforms that's agnostic to infrastructure, plus the right network security management tools. Tufin Orchestration Suite's SecureTrack is a comprehensive firewall and security policy management solution for multi-vendor firewalls, next-generation firewalls and multi-cloud platforms (public, private and hybrid). Tufin Orchestration Suite provides a single console for firewall admins, security admins and network operations teams. Its SecureTrack component ensures that firewall and security policies are optimized to enable business agility while meeting the most stringent security and compliance requirements.

### Firewall Policy Management

Tufin Orchestration Suite's SecureTrack provides a central repository of all the firewalls rules and objects to simplify management across multi-vendor, multi-platform technologies. Using this repository, rule optimization is easy – including cleansing, removal of shadowed, unused and overly permissive rules and more. SecureTrack provides out-of-the box firewall management reports to speed up firewall operations.

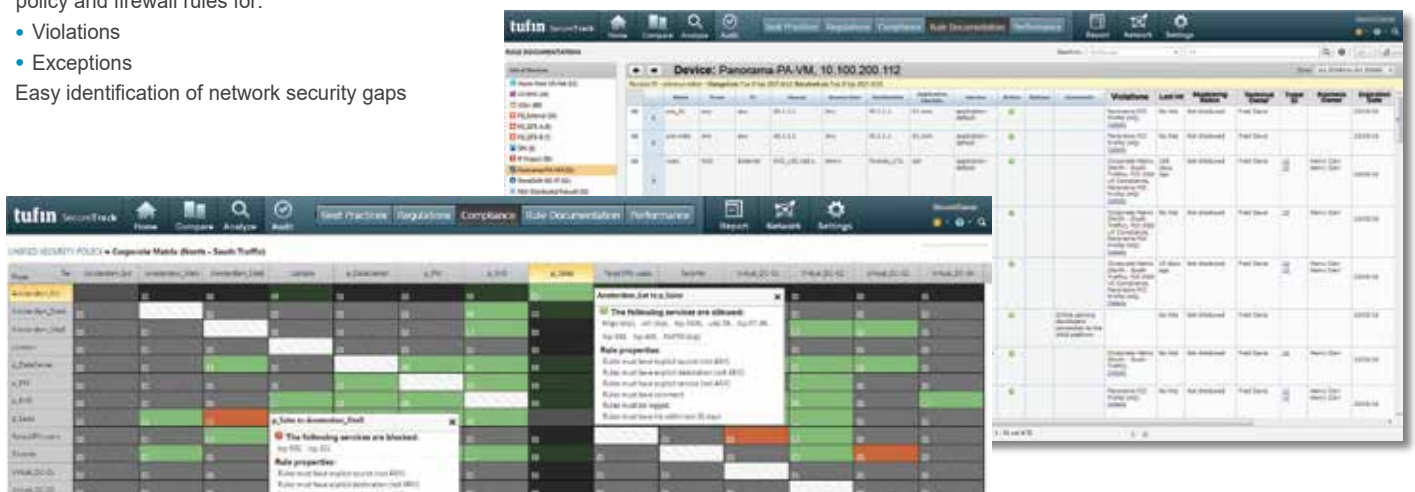

### Enterprise Network Security

With the dramatic rise in cyber threats, enterprise IT requires tight, centralized security policy management across all platforms and devices. Tufin helps you to improve network security with a centralized, real-time picture for tightening your enterprise's security posture:

- Comprehensive repository to define organization's security policy - including network segmentation and visualization, risky services and risk analysis (whitelist / blacklist), rule properties, simulations and best practices
- Powerful management tools - including dashboard, reporting, searchable correlation between policy and firewall rules for:
  - Violations
  - Exceptions
- Easy identification of network security gaps

### Highlights and Benefits:

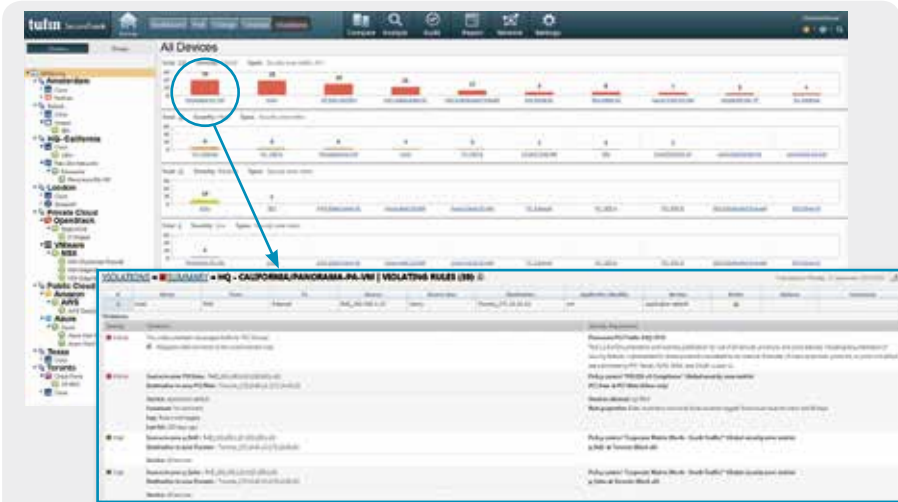

- Speed up and simplify firewall operations
- Gain end-to-end visibility across the entire enterprise – physical/on-premise networks and hybrid cloud platforms
- Manage and control enterprise security policy from a single console
- Ensure continuous compliance and auditability
- Support multi-vendor, multi-technology, multi-cloud environments

## Compliance & Audit Readiness

Tufin Orchestration Suite's SecureTrack enables continuous compliance with real-time monitoring and alerts for security policy and regulatory compliance risks. This assures accountability, transparency and consistency your compliance policy framework. Its automated audit trail allow you to rapidly generate a variety of customizable audit reports that comply with regulatory standards such as PCI-DSS, SOX and NERC CIP and more.

Continuous policy and regulatory compliance with automated audit trail, dramatically saving time for audit preparation

## Tufin at a Glance

**Offices:** North America, Europe and Asia-Pacific

**Customers:** More than 1,600 in over 50 countries

**Leading Verticals:** Finance, telecom, energy and utilities, healthcare, retail, education, government, manufacturing, transportation and auditors

**Channel Partners:** More than 240 worldwide

**Technology Partners & Supported Platforms:** Amazon Web Services, BMC, Blue Coat, Check Point, Cisco, F5 Networks, Fortinet, Intel Security, Juniper Networks, Microsoft Azure, OpenStack, Palo Alto Networks, VMware and more

## Real-Time Firewall Change Tracking and Visibility

SecureTrack's real-time visibility into all firewall and security changes across the enterprise provides clear insights into network connectivity and policy changes, with alerts for potential new security risks. With this real-time visibility, trouble-shooting of issues is simple and quick. SecureTrack provides firewall administrators and security teams with the tools required to rapidly understand and manage network security.
